

HEADMOUSE AND VIRTUALKEYBOARD, AMONG THE TOP 100 IDEAS

- **The magazine Actualidad Económica has awarded Indra the prize for the most innovative solutions in accessible technologies**

June 1, 2010. - On May 31, Actualidad Económica celebrated its award ceremony for the Top 100 Ideas. Indra received an award for its accessible technology solutions, Headmouse and VirtualKeyboard, developed under the Indra-Fundación Adecco Chair at the University of Lleida.

This prize acknowledges the usefulness of both of these benchmark projects in innovation. The Headmouse virtual mouse enables control of the computer mouse using a webcam, with facial and head movements. VirtualKeyboard makes it possible to write using any device with the capacity to control the cursor. Both software packages can be downloaded, free of charge, from the address www.tecnologiasaccesibles.com.
